Training courses - schedule & details

Radiological Protection of the Environment Training Courses

The overall objectives of each course are to ensure participants:

- are conversant with assessment objectives;
- have a basic understanding of radionuclide transfer, dosimetry and radiation effects;
- know how to use available tools;
- can interpret the results;
- understand the implications of how the tools are used.

The ERICA Assessment Tool is available to download from: www.erica-tool.com

We can organise courses tailored to your needs - if you require more information please contact: Dr Ingo Schüder via UKCEHtraining@ceh.ac.uk
