

IAEA EMRAS II Biota Modelling Group- questionnaire closed

IAEA EMRAS II Biota Modelling Group- questionnaire

Your views are required by IAEA EMRAS II Biota Modelling Group. The Biota Modelling Group is reviewing the requirements for dynamic modelling within environmental (i.e. wildlife) radiological assessments, together with an overview of available models. To help achieve this we are consulting with colleagues using a questionnaire. The questionnaire can be found [here](#).

Note: Questionnaire now closed.
Further information available soon.
