

# Publish a vocabulary

Vocabularies that are created and/or edited in the vocabulary editor are not available to the public until they are formally published. Once published they are accessible for the public to view without restriction at <http://vocabs.ceh.ac.uk/>.

 Only users in a [Vocabulary Manager](#) role are able to publish vocabularies

To publish the production copy of a taxonomy:

Open the taxonomy you wish to publish

Go to the **Export** tab

Click on the **Taxonomy as Explorer Published Version** link

The screenshot shows the 'Export' tab in the Taxonomy Manager interface. The navigation bar includes 'Taxonomy', 'Dashboard', 'Settings', 'Users', 'Import', 'Transform', 'Export', 'Reports', 'Workflows', and 'Manage'. The 'Export' tab is active, displaying several options:

- SPARQL Endpoint**: Query with SPARQL. Create and display saved queries. Export results.
- Export using Saved SPARQL Query**: Displays a list of all SPARQL queries saved for this Taxonomy. Execution of the SPARQL query will export the returned values in the chosen format.
- Export using Saved Search**: Displays a list of all searches saved using the search form for this Taxonomy. Execution of the search will export the returned values in the chosen format.
- GraphQL Queries**: Write and execute GraphQL queries using an interactive query builder. See also: [GraphQL in TopBraid Tutorial](#)
- Export Taxonomy as a Graph**: Exports the entire Taxonomy in one of the formats below.
  - JSON-LD
  - N-TRIPLES
  - RDF/XML
  - TURTLE
  - TRIG
  - TriG (with includes)
  - TriG (with includes and in
- Publish Taxonomy for Explorer Users**: Allows read-only Explorer users to browse the Taxonomy. (This option is highlighted with a red box in the image.)
- Export Hierarchy Spreadsheet**: Creates a hierarchical spreadsheet from the concept tree.
- Export Concept Overview Spreadsheet**: Creates a spreadsheet with one row for each concept.
- Export SharePoint Import File**: Exports this taxonomy into a file that can be imported into SharePoint.

Choose an option from the STATUS dropdown:

- **Published**. If this is the first time you are publishing the taxonomy
- **Update Published Copy**. If you are updating a taxonomy that is already published

A dialog box will show the progress of the publication process and will inform you when the publication/update is complete
