

IAEA EMRAS II Biota Modelling Group - Your views required

Your views are required by IAEA EMRAS II Biota Modelling Group

The Biota Modelling Group is reviewing the requirements for dynamic modelling within environmental (i.e. wildlife) radiological assessments, together with an overview of available models. To help achieve this we are consulting with colleagues using a questionnaire. The questionnaire can be found on the [IAEA](#) page.

If you would like to participate in the review please send your completed questionnaire to jvibat11@SCKCEN.BE by 28th February 2011.

To date (January 2011) we have had 13 responses from regulators, industry and model users/developers in Europe and North America.

A summary of the initial response will be available by the end of January 2011.
