

# Wiki Data Corruption - 24th May 2016

Due to human error during system upgrade preparations the data on the wiki for today, 24th May 2016, has been corrupted. We've had to restore the system back to a known state from the previous evening. Unfortunately this means that any content that has been added or updated today will have been lost.

Please accept our apologies for this data loss and any inconvenience it may cause you. Rest assured we will do our utmost to ensure this does not happen again in the future.

Feel free to [contact us](#) should you have any concerns or issues.
