Wiki upgrade - Friday 3 May 2013

> ⓘ **Why...**
>
> Upgrade the wiki?

> ✓ **Because...**
>
> We need to stay current to keep up with security patches and ensure our vendor support continues by running the latest versions.

> ⚠ **When...**
>
> The upgrade will take place on **Friday 26th April, the service will be offline from 8am until approx 12pm**, we apologise in advance for any inconvenience this may cause you.

How will this affect me?

The major change with this upgrade is the ***removal of the existing wiki markup editor***. This is being replaced with a brand new WYSIWYG rich text editor. This will impact you the most if you've been used to using the Wiki Markup editor to create your pages, in that case Atlassian has put together a page of useful tips to help you adjust. Even if you're used to using the old rich text editor Atlassian has some tips for you too to help transition to the new environment.

We would encourage everyone to read through the pages linked to above, it will help you once the upgrade is complete.

Questions or concerns?

Please get in touch with us if you need more info or if the timing of this upgrade will seriously impact your work.

Technical information

We are upgrading Confluence, the software powering this Wiki, to version 4, you can find out lots more about all the changes included by visiting the Atlassian website.
